DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 17, 18 and 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Hergott et al '035.

Hergott et al teach an automatic control for terminating the filling of a sausage casing, and method of use thereof. More specifically, the apparatus of Hergott et al can perform the method of filling a natural hollow elongated casing with a meat emulsion, comprising placing a casing on an elongated meat emulsion stuffing tube 16A having a discharge end. The discharge end will push the natural casing longitudinally by pumping meat emulsion through the stuffing tube. A slidably mounted thrust collar 18 A is positioned on the stuffing tube behind the natural casing and intermittently pushes the thrust collar against the casing insufficiently to create squeezing or compression pressure thereon but to facilitate the normal forward movement of the casing on the stuffing tube. In regards to claim 3, the discharge end of the stuffing tube extends through a hollow chuck. A resilient brake element is positioned in the chuck. As for claim 4, a conventional rotary linker is located downstream of the discharge of the stuffing tube to link the natural casing filled with the meat emulsion. Regarding claims

6, 17 and 18, the thrust collar is slidably mounted on the stuffing tube behind the natural casing, and intermittently pushes the thrust collar against the casing.

Conclusion

Summary: Claims 1-6, 17, 18 and 22-24 are rejected.
